Good morning Yvette,

Things are moving forward and it's a pleasure to hear from as well. No problem, I will ensure that you receive photographs of the EAX demolition project.

V/R

Robert

Good morning Robert,

Hope all is well. Haven't talked with you in ages.

If you're planning on taking photos as the demolition occurs, would you mind sharing. I would love to see how it looks as they reduce the building day by day.

Take care,  
Yvette

Jonathan – thank you. I was not aware of the schedule. I have a little concern with the following bullet however.

- “All the construction debris and weights that can be recycled will be provided to NERL Las Vegas to comply with the Agency's Environmental Management program. “

I suspect this is just informational, but I have to ask – EPA is not incurring any cost associated with this – correct? Also, this was a leased facility, so I don't suspect we will be including any debris weights in our reporting.

**Subject:** EAX BUILDING DEMOLITION PROJECT

Hello everyone,

I attended a pre-construction meeting today surrounding the demolition of the EPA Environmental Exposure Annex (EAX) Building at the UNLV Facilities Management Planning and Construction Department. The moment of truth that everyone has been waiting for is finally coming to fruition. The EPA (EAX) Building that was constructed in 1967, will be demolished on 3/30/2017. The entire demolition project will take approximately one week and is scheduled to be completed on 4/7/2017.

All the construction debris and weights that can be recycled will be provided to NERL Las Vegas to comply with the Agency's Environmental Management program.

No parking impacts were identified for EPA employees during the demolition project. The EPA parking spaces located on the Northside of the QAL Building will remain open.

Keeping you all informed as we continue to move forward with the Agency's Environmental Diligence and Consolidation milestones.

Cordially,

Robert W. Andrews Jr.
